WHO WE ARE?

Leopad Home's production and e-commerce divisions are located in the Fengrun Industrial Park of Tangshan, adjacent to National Highway G112, with convenient transportation and logistics resources. Covering an area of 80 mu, with a total investment of 80 million yuan and a building area of 32,000 square meters, the company has served the construction industry for 25 years. It is a professional and integrated manufacturer and service provider of building components that integrates research and development, production, sales and technical support.

Focusing on technical innovation, the company has built a 15-member professional R&D team. Equipped with four intelligent CNC production lines and a third-party certified quality inspection laboratory, the enterprise adopts advanced processes including CNC cutting, automatic welding and hot-dip galvanizing, and implements standardized full-process quality control to ensure product quality exceeds industry standards. The company's product lineup covers building steel formwork, special-shaped bridge steel formwork, steel structure houses, container houses and scaffolding. With an annual output of 120,000 square meters of standard steel formwork and 8,000 tons of special-shaped bridge formwork, it provides customized, ready-to-install products and on-site technical guidance to support smooth project mplementation.

Boasting a complete supply system and one-stop full-cycle service, the company adheres to a customer-oriented philosophy to meet diverse project demands. It has accumulated rich infrastructure experience and earned a reputable market image through reliable quality and professional services. In the future, guided by the principles of innovation, efficiency and integrity, Taogang will continuously optimize production techniques and service systems. Rooted in the Beijing-Tianjin-Hebei region and serving nationwide and global clients, the company delivers high-quality building components and integrated solutions to jointly promote innovative development of the construction industry.

Mobile Homes

Mobile homes feature modular designs and factory-prefabricated construction, combining flexibility, practicality, and modern comfort. With customizable layouts and functional configurations, they can be transported to the site and installed quickly. Selected designs also support disassembly, relocation, and reuse. Ideal for holiday resorts, temporary accommodation, mobile offices, commercial spaces, and emergency housing, mobile homes provide efficient, versatile, and cost-effective space solutions for modern living and business needs.

Applications of Mobile Homes

Construction Camps

Mobile homes are ideal for construction sites, engineering projects, and remote work camps. They can serve as worker accommodation, site offices, meeting rooms, and rest areas. With quick installation and flexible layouts, they meet diverse on-site project needs.

Cultural & Tourism

Mobile homes are ideal for resorts, campsites, scenic destinations, and eco-tourism projects. They can be designed as unique guest rooms, leisure spaces, and campsite accommodation. Their flexible designs blend with natural surroundings, offering visitors a comfortable and distinctive stay.

Emergency & Public Use

Mobile homes can be used for temporary post-disaster housing, emergency relief, temporary medical stations, and public service facilities. Their modular design enables rapid deployment and flexible configuration, providing practical space solutions for emergencies and essential public services.

Residential & Commercial

Mobile homes are suitable for private residences, temporary housing, retail shops, cafés, and mobile offices. With customizable exterior designs and interior layouts, they combine residential comfort, commercial functionality, and efficient space utilization.

Mobile Homes Advantages

Fast Installation

Using modular prefabrication technology, mobile homes can be quickly assembled on-site, significantly reducing construction time and improving project efficiency.

Flexible Relocation

Designed for mobility and adaptability, mobile homes can be moved and redeployed according to different needs, making them ideal for temporary housing, camps, commercial spaces, and more.

Cost-Effective Solution

Compared with traditional buildings, mobile homes require less construction time and labor, helping reduce overall investment costs while improving economic benefits.

Eco-Friendly & Sustainable

Built with environmentally friendly materials and recyclable designs, mobile homes help minimize construction waste and support sustainable building practices.

Customizable Design

Available with customized layouts, appearances, and functional configurations to meet various applications, including residences, hotels, offices, and retail spaces.

Safe & Comfortable Living

Featuring excellent insulation, heat resistance, moisture protection, and sound-proofing performance, mobile homes provide a safe, comfortable, and durable living environment.

Space Capsule

- Futuristic Design
- Factory Prefabrication
- Comfortable Living
- Rapid Deployment
- Flexible Configuration
- Eco-Friendly & Sustainable

“

Space capsules are innovative prefabricated buildings that combine modern architectural aesthetics, modular design, and smart living concepts. Manufactured through factory prefabrication and integrated production, they feature stylish exteriors, compact structures, efficient installation, and flexible layouts. Interior spaces can be customized with bedrooms, bathrooms, lighting, air conditioning, and other facilities to maximize comfort and functionality. Modular construction helps improve installation efficiency and reduce on-site work, while multiple units can be arranged to suit different project requirements. Space capsules are ideal for holiday resorts, boutique accommodations, eco-tourism destinations, scenic attractions, and leisure projects, offering modern, functional, and environmentally conscious solutions for the hospitality industry.

Apple Cabine

The Apple Capsule is a modular prefabricated building featuring a distinctive rounded design that combines modern architectural aesthetics with comfortable living. Its sleek, minimalist appearance and panoramic glass windows maximize natural light and create an open, inviting interior. Manufactured using factory-prefabrication and integrated production methods, it helps improve installation efficiency and reduce on-site construction time. The interior can be customized with bedrooms, bathrooms, lighting, air conditioning, and other amenities to enhance comfort and functionality. Ideal for grassland camps, mountain resorts, eco-lodges, scenic destinations, and boutique glamping projects, Apple Capsules can be installed individually or arranged in clusters, offering stylish, practical, and environmentally conscious accommodation solutions for the tourism and hospitality industries.

- Cost-Effective Solution

The Container Mobile House is a modern building solution that combines modular design, convenient transportation, and versatile applications. Built with a sturdy steel frame, it can be customized to meet different functional and aesthetic requirements. Its modular construction helps shorten installation time and reduce on-site work, while allowing convenient relocation and potential reuse. The interior can be flexibly configured with bedrooms, living areas, offices, and bathrooms to balance practicality and comfort. It is suitable for a wide range of applications, including residential accommodation, construction-site dormitories, temporary offices, retail spaces, storage facilities, holiday resorts, and emergency housing. With its cost-effectiveness and adaptable design, the Container Mobile House offers an efficient and practical modular building solution for modern residential and commercial needs.

Packaged Container

The Flat-Pack Container House is a prefabricated building solution featuring modular design, a steel frame structure, and a knock-down assembly system. Its components can be packed flat for efficient transportation and storage, helping optimize logistics and reduce shipping costs. Designed for convenient on-site assembly, it allows flexible customization of doors, windows, wall panels, and interior layouts to meet different functional requirements while maintaining practicality and comfort. Flat-pack container houses are widely used for construction-site accommodation, temporary offices, worker housing, commercial spaces, storage facilities, and emergency shelters. They provide a cost-effective, efficient, and adaptable modular building solution for both temporary and long-term space requirements.
